

# Plasticdor Lockable

Non – fire rated

## Application

Access Panels are designed to conceal and secure areas in walls and ceilings where access is required to electrical, water and maintenance services, concealed behind or above them. This access panel requires no mechanical fixings or stud work is required to fix to.

## Description

This access panel has a pivoted hinge system and key lock within the plastic mold design.

## Materials and finishes

These access panels are manufactured from injection molded white styrene plastic. The plastic profiles for the door and frame are 3.5mm thick. The panel faces have a white textured finish which can be overpainted if required.

## Installation

A silicon or glue fixing will be enough to secure this panel to your wall or ceiling.

## Stocked - Sizing

- 100 x 150
